#### **DETAILED ACTION**

### Response to Amendment

1. Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.

#### Claim Rejections - 35 USC § 112

- 2. The following is a quotation of the first paragraph of 35 U.S.C. 112:
  - The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.
- 3. Claim 23 is rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The claim requires a 100% solids tape; however the specification has not clearly set forth what it is that defines the tape as being a "100% solids" tape. Clarification is required.

#### Claim Rejections - 35 USC § 102

4. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Application/Control Number: 09/505,052 Page 3

Art Unit: 3635

Claims 8-15,24 and 27 are rejected under 35 U.S.C. 102(b) as being anticipated by US
Patent #3,937,640 to TAJIMA et al. In reference to claims 8 and 27, TAJIMA et al. discloses a method for applying a walkway pad (26) to a roofing membrane (35) including the steps of providing a walkway pad (26); applying a solids tape (20) to a planar surface of the pad (26); applying the walkway pad (26) to a rooftop (unlabeled) by placing an exposed surface of the tape (20) to an upper surface of the rooftop. Regarding claim 9, the tape (20) is disposed about the back surface "proximal" the edges of the pad (26). In reference to claim 10 the walkway pads (26) are rubber-based, column 3, lines 50-60. Regarding claim 11, the tape comprises EPDM, column 6, line 19. In reference to claim 12, the walkway pads (26) are rubber-based, column 3, lines 50-60 and the tape comprises EPDM, column 6, line 19. Regarding claim 13, the roof area is prepared prior to removal of the release paper, column 11, line 64. In reference to claim 14 and in further regards to claim 27, the tape (20) is applied at the place of manufacture. Regarding claim 15, the pad (26) may be applied also without priming. In reference to claim 24, the method further includes removing the release paper.

#### Claim Rejections - 35 USC § 103

6. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Application/Control Number: 09/505,052 Page 4

Art Unit: 3635

#### Claim Rejections - 35 USC § 103

- 7. Claims 1-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over US Patent #3,937,640 to TAJIMA et al. Regarding claim 1, TAJIMA et al. discloses a method for applying a walkway pad (26) to a roofing membrane (35) including the steps of providing a walkway pad (26); applying a solids tape (20) to a planar surface of the pad (26) where the tape includes a release paper (14,15); removing the release paper (14,15); and applying the walkway pad (26) to a rooftop (unlabeled) by placing an exposed surface of the tape (20) to an upper surface of the rooftop. TAJIMA et al. discloses the basic claimed method except for the step of applying a force. Although TAJIMA et al. is silent in this regard, it would have been obvious to one having ordinary skill in the art at the time the invention was made that a force be applied to the walkway (26) in order to increase the surface adhesion and ensure attachment between the pads (26) and the roofing membrane (35). In reference to claim 2, the walkway pads (26) are rubber-based, column 3, lines 50-60. Regarding claim 3, the tape comprises EPDM, column 6, line 19. In reference to claim 4, the walkway pads (26) are rubber-based, column 3, lines 50-60 and the tape comprises EPDM, column 6, line 19. Regarding claims 6 and 7, the roof area is prepared prior to removal of the release paper, column 11, line 64.
- 8. Claims 16-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over US Patent #3,937,640 to TAJIMA et al. Regarding claim 1, TAJIMA et al. discloses a method for applying a walkway pad (26) to a roofing membrane (35) including the steps of preparing a walkway pad (26) and bundling the walkway pads (26), column 1, lines 60-61. TAJIMA et al. discloses the

Application/Control Number: 09/505,052

Art Unit: 3635

basic claimed method except for the step of delivering the walkway pads (26). Although

TAJIMA et al. is silent in this regard, it would have been obvious to one having ordinary skill in

the art at the time the invention was made that a force be applied to deliver the pads (26) to

persons for application thereof. In reference to claim 17, the walkway pads (26) are rubber-

based, column 3, lines 50-60. Regarding claim 18, the tape comprises EPDM, column 6, line 19.

In reference to claim 19, the walkway pads (26) are rubber-based, column 3, lines 50-60 and the

tape comprises EPDM, column 6, line 19. Regarding claim 20, the tape (20) is disposed about

the back surface "proximal" the edges of the pad (26). In reference to claim 21 and in further

regards to claim 27, the tape (20) is applied at the place of manufacture. Regarding claim 22, the

pad (26) may be applied also without priming. As best understood, the tape (20) is a 100% solids

tape.

Response to Arguments

9. Applicant's arguments with respect to the claims have been considered but are moot in

view of the new ground(s) of rejection.

10. Any inquiry concerning this communication or earlier communications from the examiner

should be directed to Yvonne M. Horton whose telephone number is (703) 308-1909.
